美髮及美容中心

To achieve a revitalisation of skin cells, active ingredients must reach the cell core. Until now, this was only possible with invasive therapies. Today, there is the PURE® TDA System (TDA stands for Transdermal Application), a dermatological therapy system that is able to transport concentrated anti-aging ingredients at supersonic speed and frequency to the dermis. The treatment system consists of a computer-guided application station and applicator, which is moved at a certain distance over the targeted skin areas during treatment, without direct skin contact. The effect achieved is a light, cool massaging pressure.

Active ingredients are mixed with Valeosan®, a patented fluid vehicle containing amino glucose-glucan precursors that enables deep skin penetration to attack damaging hypoxias and enable improved blood circulation without needles and without pain.

The PURE TDA Facial - The treatment begins after a facial cleansing with the PURE CELL dermabrasion system, a 3D sapphire coated premium steel tool set that gently and precisely removes the very upper cells of the skin. The action of the PURE CELL dermabrasion system supports the uptake of TDA active ingredients (e.g. hyaluron complexes) and activates collagen forming cells.

Deposits of the active ingredients impair free radicals and improve cellular metabolism in the dermis. Once the deepest layers of the skin have been reached, the cell's own detoxification system is activated and local hypoxias are effectively combated. As a consequence cell nourishment is activated further, ensuring sustainably improved skin and visible tightening. It regenerates itself from the inside and regains its natural tautness. A tightening of the natural structures of the skin can be seen, and the depth of wrinkles is reduced.

最新的無創治療科技 提供皮膚再生療程美容 TDA 系統。

達到恢復皮膚細胞活力，活性成份必須達到細胞核心。直到現時，大部份美容療程提供侵入性治療。現在，PURE® TDA 系統（TDA 即浸透皮膚程序），皮膚病學治療系統能夠以超音速的速度和頻率集中傳送抗衰老成份到真皮層。系統包括一個計算引導機和應用程序器，療程中針對在需要改善皮膚的地方保持一段距離的移動，不會直接接觸皮膚。給您有輕微和清涼按摩的感覺。

混合了 Valeosan® 是主要成分，獲得專利的乳液含前體的氨基葡萄糖葡聚糖，避免刺針和無痛，亦能深層滲透肌膚，攻擊破壞缺氧細胞和改善血液循環。

PURE TDA 美容療程 — 使用 PURE CELL 磨皮系統清潔肌膚，3D 優質藍寶石塗層工具，輕輕和精確地去除最表面的皮膚細胞。PURE CELL 磨皮系統支援的 TDA 活性成份的吸收（如透明質酸複合物）和激活膠原蛋白細胞形成。
